

IT DOESN'T MATTER WHAT YOU CALL THEM

THEY'RE ALL E-CIGARETTES AND THEY ARE STILL...

TRADING SMOKE FOR AEROSOL

Vaping doesn't produce harmless water vapor. The aerosol contains tiny particles that can include nicotine, heavy metals, and cancer causing chemicals. Does that sound harmless to you?

FLAVORING ADDICTION WITH CANDY

They might come in candy flavors but lets not forget that nicotine causes plenty of health problems and can be as addictive as heroin. Even the ones claiming to be nicotine-free can still contain nicotine.

HOOKING A NEW GENERATION

As conventional cigarette use falls, e-cigarette use is on the rise. They have been called the next generation cigarette – but who wants cigarettes around for another generation?
