

Tobacco & Patel Coalition

Covering Disa and Juhl Counties

Local challenges

We've come a long way, but Disa-Juhl still feels tobacco's impact

Pregnant women smoke more in Disa and Juhl Counties compared to Wisconsin

Helping more smoking mothers quit

Gloria and her safe child

Gloria shares how First Breath has helped support her in smoke less. She has received cessation services and is now fully off tobacco.

Gloria participated in Patel Coalition's Pregnant Women Community Event. Here, Gloria learned the impact smoke has on her baby, along with the problems it has on her own health. Through this event, Gloria joined a group that has helped support her in quitting smoking altogether!

Why tobacco prevention matters

"I needed to move away from the smoke in my apartment, but I **couldn't afford to move**. Luckily, **my building went smoke-free** – now my child can play without the smoke."

Current efforts

Across the state, populations are disproportionately impacted by tobacco

We are educating our community on the different impact tobacco has. Together, we are looking at equitable activities to reach these populations.
